

Third-Party APIs

Web Development
Module 05

The Big Picture

Boot Camp Pointers

As you work through this module, remember the following:

01

Developers are lifelong learners. Embrace challenging opportunities as learning moments.

02

Learning how to find the answer you're looking for is a skill in itself.

Use Google, read the documentation, and work with other developers (such as your classmates!).

03

Other than HTML, CSS, and JavaScript, every technology you learn in this course is one option out of many. Remember that part of what you're learning is how to think like a developer.

This Week: Third-Party APIs

This Week: Third-Party APIs

By the end of this week, you'll be able to:

Implement third-party libraries such as Bootstrap, jQuery, and Moment.js

Perform DOM traversals and manipulations with jQuery

Use jQuery to save user input in local storage

Work with the Bootstrap grid layout in HTML and work with Bootstrap components

Add custom color styles to an existing CSS framework

Work with custom fonts and icons via a content delivery network (CDN)

This Week's Assignment

How will you use this module's content in your next assignment?

Career Connection

How will you use this module's content in your career?

How to Succeed This Week

Tips for Success: Third-Party APIs

Keep these tips in mind:

01

Third-party APIs solve a specific problem with a technology, but they aren't a replacement for the original technology. It's important to understand the problem they're solving.

02

Even the most experienced coders have to read documentation when they learn a new technology. It's a skill that you must develop—so start now!

Today's Agenda:

Which skills will you learn today?

Make sure that you've downloaded the relevant class files!
